

CPC (Cleaning & Polishing Compound)

CPC is designed to enhance, protect and extend the life of any floor finish. Apply CPC each time the floor is burnished. CPC is transparent and leaves a non-slip, dust free, non-yellowing, mark resistant film that prolongs re-coating cycles and the life of floor pads. Consistent use of CPC has been proven to save 50-70% on labor, 30% on material costs and helps eliminate stripping.

Frequently Asked Questions

Q. Can I keep burnishing dry?

A. By burnishing dry you are powdering the finish off the floor creating airborne dust particles. The high speed burnisher and floor pad creates heat and friction that acts like sandpaper to the floor finish. Use CPC every time you burnish to add a fresh film of Synchro Brite protection. You will be amazed at how little of CPC you will use.

Q. How does CPC compare to spray buff or restorer type products?

A. Both spray buff and restorers contain polymers that make up floor finish along with a cleaning agent. By using either product you are adding more floor finish each time you apply. If the floor isn't completely clean you will mix dirt in with the spray buff or restorers. CPC contains no polymers and will not build up each time it is applied. Each time you apply CPC you remove the last protective film and any dust or dirt trapped in the film and leave behind a new protective film *synchro-brite* that enhances the finish that is present on the floor and traps dust and dirt before it penetrates into the finish. Ex. 1 gallon Spray Buff covers 30,000 sq. ft. 1 pint bottle CPC covers 225,000 sq. ft.

Q. How often should I use CPC?

A. Use CPC anytime you burnish. Unlike spray buff or restorer products you only have one coat of *Synchro-brite* protection on the floor at one time. You will never get build-up, powdering, discoloration and your floor will always be safe and maintain a fantastic shine. Remember with CPC you never use much product. 1 pint bottle covers 225,000 sq. ft.

No. 990

Q. How is CPC packaged?

A. CPC is packaged in pint (32 oz.) bottles. There are 4 bottles in a box, 4 boxes in a master case. CPC can be purchased in boxes or master cases.

Q. How do I apply CPC?

A. CPC can be applied with any speed floor machine from low speed side to side to propane burnishers (Burnishers produce the best shine). Use a medium grade hair pad or equivalent. We have been using the **Blue Blend Burnish Pad by Americo**. Squeeze a 3 inch ribbon of CPC on the floor and place your floor machine over the CPC and burnish as fast as you can walk.

Q. What is the best pad for applying CPC?

A. You can use any pad you burnish with now. We found that a medium grade hair pad or the **Blue Blend Burnish Pad by Americo** works great. Both of these pads can also be used to scrub and spray clean. *We use only 1-2* different floor pads with our system.

Q. Do I need a special floor finish before applying CPC.

A. No, you can start right away. CPC can be applied to any burnishable floor finish. You may need to restore or strip your floor first depending on condition.
